

BASAVA SANKETH B N

BUSINESS ANALYST

Bengaluru, Karnataka | basavasankethbn@gmail.com | +91 96115 52705 | linkedin.com/in/basavasankethbn | github.com/sankethbn

Business Analyst who takes a product from the first requirement through BRD and FRD, user stories, sprint delivery and UAT. Pitched, defined and delivered an AI chatbot that cut a 30-minute manual process down to about five minutes. Comfortable writing the requirement and the SQL that proves it.

PROFESSIONAL EXPERIENCE

Logic Lumin Software, Business Analyst Remote, Shimoga | Jan 2026 - Present

- Joined a live UK HR and payroll build mid-project as Logic Lumin's first Business Analyst and picked up its requirements.
- Ran a gap analysis between what was built and what the client needed, found business rules nobody had written down and confirmed each one with the client's HR team.
- Wrote and maintained the BRD and FRD in Confluence covering salary runs, payslips, leave and attendance, PAYE, National Insurance and pension auto-enrolment, learning the UK rules on the job.
- Wrote 30+ Jira user stories with acceptance criteria and took them through sprints with our Development Manager.
- Mapped the payroll-run and leave-to-pay flows and walked the client through Figma screens before development, so workflow issues got fixed at the design stage.
- Wrote 40+ UAT test cases in Excel and checked payroll outputs with SQL, catching around a dozen defects before release.

Upskilling and job search Sep 2025 - Dec 2025

- Prepared for the BITS Pilani MBA and taught myself PRD writing by documenting RIA end to end (PRD, BRD, FRD, UAT plan) on GitHub.

Inxite Out Remote | Feb 2024 - Aug 2025

Data Analyst Aug 2024 - Aug 2025

- Promoted from intern after pitching RIA, an AI chatbot, to the CEO, CTO and COO. Shaped it around the questions clients kept emailing us, wrote the BRD and FRD and handled UAT before launch.
- Cut YouTube data extraction from 30+ minutes to about 5 with RIA (83% faster). Clients could ask their own sentiment questions, which removed 50+ ad-hoc report requests a month.
- Tested RIA against a ground-truth dataset with A/B testing and manual QA alongside the data-entry team, reaching 80%+ accuracy before rollout. It held up on a single video with 10,000+ comments.
- Ran sprint planning and standups with engineering, rolled RIA out in four phases and added bulk URL upload after the MVP. Set up login and project-level access so each client's data stayed separate.
- Handled requirements and client calls for 20+ Mahindra & Mahindra vehicle-launch analyses in Power BI.
- Found the root cause when a YouTube API change broke extraction and got it running again with no data loss.

Data Analyst Intern Feb 2024 - Jul 2024

- Turned Mahindra & Mahindra customer interviews into transcripts with OpenAI Whisper, structured them in Python and built Excel and Power BI reports.
- Flagged repeated customer feedback on the Bolero's urea-tank position in client reporting; Mahindra subsequently moved it to the other side of the car.

Insight Consultants, Data Analyst Intern Jul 2023 - Jan 2024

- Cleaned client data with SQL and Python, built Excel reports and dashboards and helped with client analysis.

SKILLS

Business analysis: Requirement gathering, stakeholder management, BRD, FRD, PRD authoring, user stories, acceptance criteria, process mapping, gap analysis, UAT, MoSCoW prioritisation, sprint planning, agile delivery, change requests, KPI tracking, SOP design

Tools: Jira, Confluence, Miro, Figma, Visio, Notion, Advanced Excel, Power BI, Google Sheets, Google Analytics

Data and AI: SQL, Python, data validation, OpenAI API, LLM evaluation, prompt engineering, NLP, OpenAI Whisper

EDUCATION

MBA, Digital Transformation, BITS Pilani, <i>part-time, online</i>	2026 - 2028
Bachelor of Engineering, Jawaharlal Nehru National College of Engineering	2018 - 2022
Data Science Programme, Skill Sequel	2022 - 2023
