

# BASAVA SANKETH B N

Associate / Junior Product Manager  
Bengaluru, Karnataka|basavasankethbn@gmail.com|+91 96115 52705|linkedin.com/in/basavasankethbn|github.com/sankethbn

## PROFESSIONAL SUMMARY

Two years on an enterprise analytics product, working with clients alongside the product team. At Inxite Out I found that customers kept complaining about the urea tank position on the Mahindra Bolero, flagged it and Mahindra moved it. Six months in I pitched an AI chatbot, RIA, to the CEO, CTO and COO. It was approved, I wrote the BRD and FRD, ran the sprints and the accuracy evaluation and it shipped: 83% less extraction time, roughly 80% less repetitive prep work for a 3-person team and 50+ report requests a month off us. I was promoted after that. Looking for an associate or junior product role where finding the problem and getting it built is the job. Available immediately; my MBA is part time and online.

## PROFESSIONAL EXPERIENCE

|                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |                               |

| <ul style="list-style-type: none"><li>Left data engineering on purpose. The work I was good at was finding the problem, arguing for a fix and getting it built, so I have been aiming at product roles.</li><li>Documented RIA's product discovery, PRD and user stories from scratch as a self-directed exercise, published on GitHub. Also completed MySQL for Data Analytics and Microsoft Business Analysis Fundamentals, picked up Jira, Confluence and Visio, and started an MBA in Digital Transformation at BITS Pilani, part time.</li></ul>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |                               |

## SKILLS

**Product:** Product discovery, customer research, PRD, BRD/FRD, user stories, backlog and sprint planning, standups, phased rollout, MVP scoping, UAT, A/B testing, ground-truth evaluation, gap analysis, competitor analysis, KPI tracking, incident management, stakeholder management

**Data & reporting:** SQL, Spark SQL, Python, PySpark, Advanced Excel, Excel dashboards, Power BI, Google Sheets, Azure Databricks, scalability testing

**AI:** OpenAI API integration, LLM-based sentiment and text analysis, prompt engineering, AI evaluation (ground-truth datasets, A/B testing, hallucination mitigation), Google Cloud Translation API, NLP, OpenAI Whisper, ChatGPT, Claude

**Platforms & tools:** Microsoft Azure, Azure DevOps, Notion, GitHub, Jira, Confluence, Visio, authentication and access-control systems
